ABSTRACT

Information on the geographic origin of fall 1980 first-time freshmen for both the public and private sectors of Colorado higher education is presented. Detailed data is also appended by institution and by county of high school. Among the findings are the following: fewer than one-third of the 1979 and 1980 Colorado public high school graduates entered Colorado public colleges and universities the year of their high school graduation: an additional 2.4 percent of the 1980 Colorado public high school graduates entered the state's private higher education institutions: it is estimated that approximately 2 percent left their home state of Colorado to attend college elsewhere: 1980 Colorado high school graduates comprised 43.6 percent of the public sector's first-time freshman class and 30.6 percent of the private sector's frist-time freshman class: 1980 Colorado high school graduates comprised 8.7 percent of the public sector's and 6.4 percent of the private sector's opening fall enrollment: a net increase of 1,002 in 1980 over 1979 first-time freshmen is attributed to increased numbers of students out of high school one or more years before matriculation: the first-time freshman class of doctoral degree granting institutions is comprised of 92.9 percent of 1980 high school graduates, for master's and baccalaureate degree granting institutions the comparable figure is 69.2 percent, and for associate degree granting institutions the figure is 42.6 percent: approximately four of every 10 private sector first-time freshmen are from a 1980 out-of-state high school graduating class, and the comparable figure in the public sector is one out of 10: and California, Illinois, and New York have been the top three sending states for over 10 years--in 1980 these three states sent 29 percent of the total out-of-state freshmen. HIGHLIGHTS

Participation Rates (Of Colorado High School Graduates in Colorado Higher Education)

- Fewer than one-third (31.9%) of the 1980 and 1979 Colorado public high school graduates entered Colorado public institutions of higher education the year of their high school graduation.

- An additional 2.4% of the 1980 Colorado public high school graduates entered the state's private higher education institutions.

- It is estimated that approximately 2% left their home state of Colorado to attend college elsewhere.

- In total, 36% of the Colorado high school class of 1980 attended college, Fall 1980.

- Over the past ten years the portion of Colorado high school graduates proceeding directly into the state's public higher education system has dropped from 44.2% to the current 31.9%. This has occurred during a period of overall growth in Colorado higher education enrollments. Growing numbers of high school graduates have delayed college matriculation one or more years.

- For ten years Arapahoe, Denver, El Paso and Jefferson counties have continued to send the greatest number of high school graduates directly into Colorado higher education. (In 1980 the four-county total was 53% of the statewide total).

Out-of-State 1980 High School Graduates

- Approximately four of every ten private sector first-time freshmen are from a 1980 out-of-state high school graduating class. Comparable figure in the public sector - one out of ten.

- California, Illinois and New York have been the top three sending states for over ten years. In 1980 these three states sent 29% of the total out-of-state freshmen.

Composition of the First-Time Freshman Class

- 1980 Colorado High School graduates comprised 43.6% of the public sector's first-time freshman class and 30.6% of the private sector's first-time freshman class.

- 1980 Colorado high school graduates comprised 8.7% of the public sector's and 6.4% of the private sector's opening Fall enrollment.

- The first-time freshman class of doctoral degree granting institutions is comprised primarily of 1980 high school graduates (92.9%). Comparable figures for master's and baccalaurete degree granting institutions and associate degree granting - 69.2% and 42.6% respectively.

- The public sector's first-time freshman class of 1980 was 1,002 greater than the freshman class of 1979. However, the state's 1980 high school graduates were 430 fewer in number than the previous year. The net increase of 1,002 first-time freshmen is attributed to increased numbers of students out of high school one or more years before matriculation.

- Statewide in the public sector of higher education, 70.6% of the total first-time freshmen, whose high school and year of graduation were known, graduated from high school in 1980. (Over one-fourth -29.5%- having been out of high school at least one year prior to college matriculation, Fall 1980). The same proportions exist in the private higher education sector.

Background

The Colorado Commission on Higher Education, as a result of its efforts to develop a statewide enrollment forecasting methodology for the public sector, recently collected from the twenty-six state-supported and eleven of the private higher education insitutions data needed to determine the current 1980 high school participation rate. (Those institutions not included were the Health Sciences Center and several private sector theological seminaries as well as the United States Air Force Academy).

For purposes of this report, the high school participation rate is defined to be the portion or percent of the Colorado high school graduating class of 1980 that proceeded directly into Colorado institutions of higher education, Fall 1980.

The report will present an analysis of the origin of the first time freshmen class for both the public and private sectors of Colorado higher education, thus going one step beyond the report of 1979 which included the public sector only.

The staff of the Commission wishes to thank each higher education institution for having cooperated in this endeavor. The private sector institutional representatives have not been requested to submit this data to the CCHE for several years and their willingness to complete the forms is appreciated. In return, it is anticipated that the report will provide valuable information to the private sector on the origin of its first-time freshman class of 1980.

Detailed information is presented by institution and by county of high school within the appendix. It is from this detailed data that individual institutions may obtain information on their market share, and the Colorado Department of Education and its individual high school districts may learn what portion of their 1980 high school graduation classes proceeded on into Colorado higher education.

FINDINGS

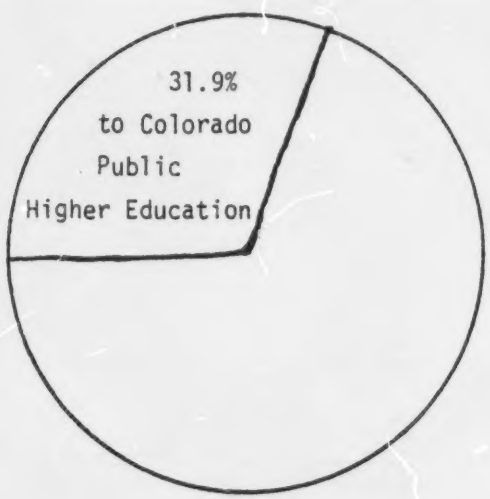
I. Colorado 1980 High School Graduates Entering the 1980 Fall Term of Colorado Higher Education

A. Public High School Graduates

1. To Public Higher Education

Colorado public high schools graduated 36,804 students in 1980. Colorado public higher education institutions have reported a total of 11,725, or 31.9% of these graduates, enrolled in the first-time freshman class of Fall 1980. (First-time freshmen are entering freshmen who have not attended college prior to the Fall term, 1980.

COLORADO PUBLIC HIGH SCHOOL GRADUATES 1980



N= 36,804

Figure 1

It is important to note that in the Fall of 1979 CCHE staff determined the participation rate of that year's Colorado public high school graduates to be 31.9%. The 1980 rate of 31.9% then confirms and lends stability to the 1979 rate which was found to be significantly below the last known participation rate of 44.2% (1969 and 1970). The drop from 44.2% to 31.9% occurred during a ten-year period of overall growth in both higher education enrollments and numbers of high school graduates.

In 1980 the actual number of high school graduates from Colorado public schools dropped below the 1979 figure by 430. Later in this report the effect of that decline on the size of the first-time freshman class of 1980 will be discussed.

2. To Private Sector of Colorado Higher Education

In 1970, the participation rate of public high school graduates in the private sector was 1.9%. This year, 875 or 2.4% of the 1980 public high school graduates enrolled in the eleven private higher education institutions as first-time freshmen.*

As Figure 2 pictures, by combining the Colorado public and private sectors of higher education, 34.3% of the 1980 public high school graduates of Colorado stayed in their home state and entered directly into higher education.

* NOTE: There are an additional four private institutions in Colorado. They are not included in this report because they do not admit students at the Freshman level.

COLORADO PUBLIC HIGH SCHOOL GRADUATES 1980

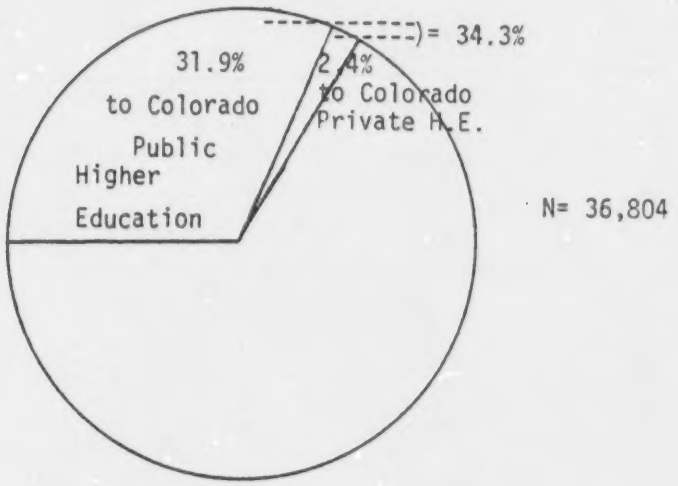


Figure 2

B. Colorado Private High School Graduates, 1980

At the time of the 1979 CCHE report on high school participation rates, information was not available as to the number of private sector high school graduates. There is no central office in the state that maintains records on graduates of the private high schools (the Colorado Department of Education maintains records for the 181 public school districts).

CCHE staff, therefore, surveyed each of the 78 private Colorado high schools and summarized the data to obtain 1,650 graduates from those schools in 1980. This figure was used to determine the participation rate of 1980 private high school graduates in Colorado higher education Fall 1980.

1. To Colorado Public Sector Institutions of Higher Education

Colorado state-supported institutions of higher education reported a total of 472 (28.6% of 1,650) 1980 private high school graduates enrolled in the Fall 1980 first-time freshman class. (Figure 3)

COLORADO PRIVATE HIGH SCHOOL GRADUATES 1980

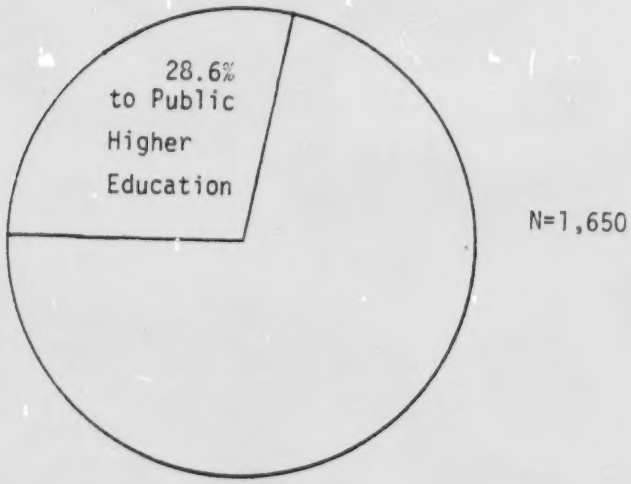

Figure 3

2. To Private Higher Education

Fall Term 1980 Colorado private higher education institutions reported 89 private high school graduates or 5.4% of the combined 1980 graduating class enrolled as first-time freshmen.

COLORADO PRIVATE HIGH SCHOOL GRADUATES 1980

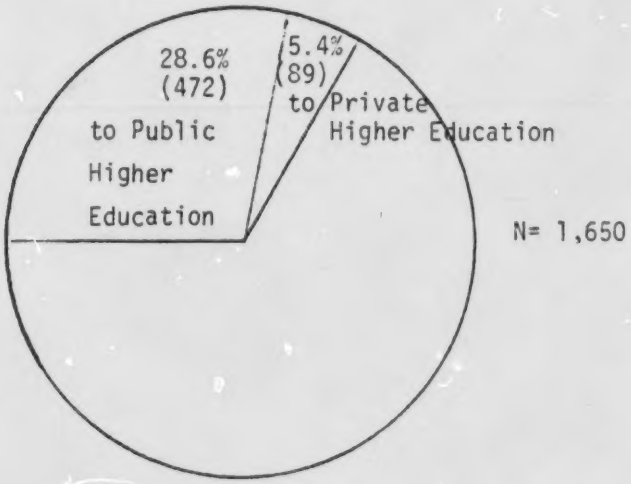

Figure 4

C. Summary Colorado 1980 Private and Public High School Graduates

The total participation rate of public high school graduates proceeding directly into Colorado higher education (public and and private sectors combined) was 34.3%. The combined participation rate of private high school graduates proceeding directly into Colorado higher education was also 34.0%. Figure 5 is a summary display of the flow of 1980 public and private high school graduates into the 1980 Fall Term first-time freshman classes of private and public higher education institutions.

COLORADO
1980 FLOW OF HIGH SCHOOL GRADUATES
INTO HIGHER EDUCATION

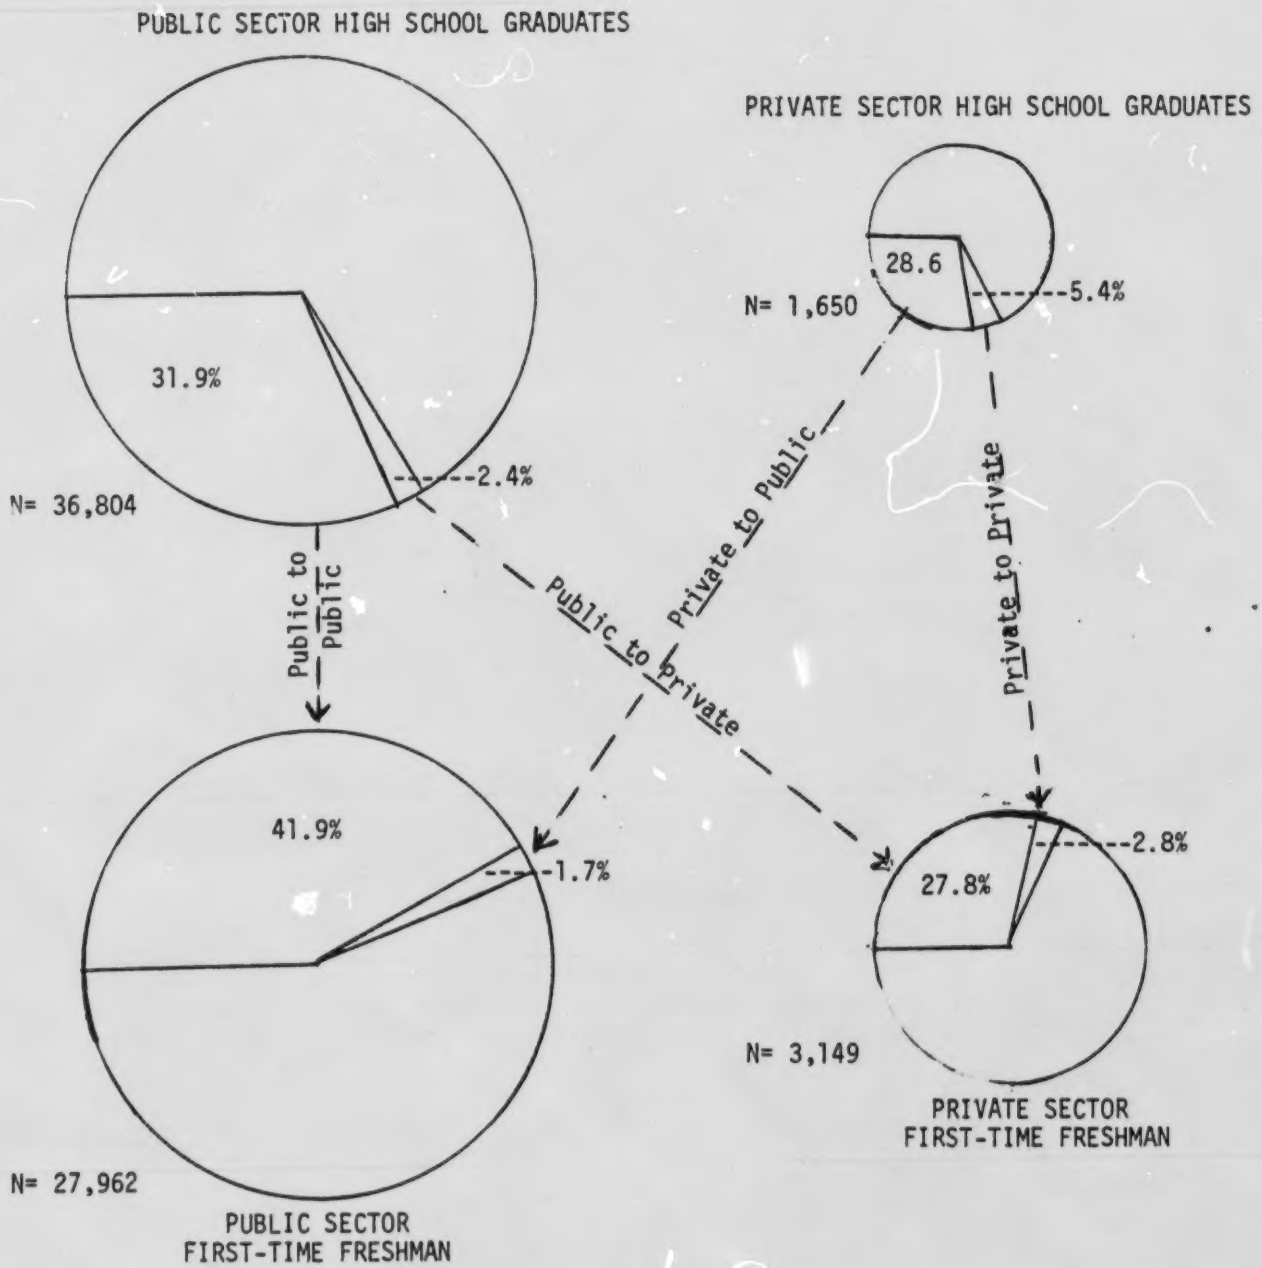

Figure 5

A natural question is, if 34% of each sector's high school graduates became Colorado first-time freshmen, how many of the remaining 66% left Colorado to attend colleges and universities in other states? We do not know precisely, however, using the residence and migration data collected by the National Center for Educational Statistics (NCES), Fall of 1979, we can approximate the number.

Results from the 1979 NCES study indicate that 1,622 Colorado residents left their home state and attended colleges and universities as first-time freshmen in other states[1]. It is perhaps not the case that the entire 1,622 were 1979 high school graduates nor that they were all public high school graduates, but for the sake of an approximation of those leaving the state, it will be assumed that they were 1979 public high school graduates. The 1,622 added to the students entering Colorado public sector higher education and divided by the total 1979 high school class of 37,234 would yield a maximum participation rate of 36.3% in 1979. In other words, it can be said in this example that 36% of the public high school graduates of 1979 proceeded directly to college somewhere in the USA.

It must be remembered that this statistic does not indicate how many 1979 high school graduates will enter college for the

---

[1] Residents of other states attending Colorado colleges and universities as first-time freshmen number 4,325 thus a net inmigration of 2,703.

first-time in later years. It is known, for instance (and this information is essential to any management of enrollment efforts), that approximately one-fourth of the Colorado 1979 and 1980 first-time freshman classes had been out of high school one or more years before matriculation.

II. Participation Rate by County of Public High School

The participation rate by county of high school is a statistic of interest not only to the institutions of higher education withir the state, but also to each K-12 local school district. The CCHE will share this data with the Colorado Department of Education and will cooperate in jointly disseminating the information to each of the state's 181 school districts.

From Table I and II and Figure 6, one can see the 1980 participation rates of public high school graduates in each of the sixty-two Colorado counties reporting 1980 high school graduates2 as well as a listing of the top ten counties.

Participation rates by county ranged from 9.68% to 62.2% with a statewide average of 34% (combined public and private higher education participation rate). Three of the ten counties (Table II) with the top participation rates - Logan, Las Animas, and Ouray, were also among the top ten in 1968 and 1969. The

ten counties sending the highest number of 1980 high school graduates into Colorado higher education were also the top ten in 1968.

Detailed participation rates by county with receiving higher education institution breakdown is provided in Appendix A.

III. Composition of the First-time Freshman Class, Fall 1980

A. Public Sector - Colorado Higher Education

The entire first-time freshman class, regardless of year of high school graduation, numbered 27,962. It has previously been mentioned that 11,725 or 41.9% of the first-time freshmen were 1980 Colorado public high school graduates with an additional 472 or 1.7% from private high schools. Figure 7 displays the flow of 1980 high school graduates into the first-time freshman class and depicts what percent that group is of the total Opening Fall Enrollment.

The 1980 Colorado high school graduates comprise 43.6% (41.9% + 1.7%) of the first-time freshman class, and 8.7% of the statewide Opening Fall Enrollment. The total first-time freshman class of 27,962 equals, as it did in Fall 1979, 19.9% of the Fall enrollment. These statistics are very important as discussions of possible decline in the number of high school graduates address the effects any decline would have on higher education enrollments.

The 27,962 first-time freshmen of 1980 represent an increase of 1,002 students above the 1979 first-time freshman class. This increase occurred at the same time that Colorado public high schools graduated 430 fewer students. Additionally, as this report has indicated, the participation rate of the high school graduates remained at the 1979 level - 31.9%. What then is the origin of the 1,002 additional students? The following Table (IV) displays the 1979 and 1980 freshman classes, and the difference in their composition.

TABLE IV

Comparison of 1979 and 1980
First-time Freshman Classes

Origin of First-time Freshman	1980	1979	Difference
1980 (1979) Colorado H.S. Grads enrolled in Public Higher Education	12,197	12,335	- 138
1980 (1979) Out-of-State H.S. Grads enrolled in Colorado	3,289	3,653	- 364
Graduated from H.S. one or more years before matriculation	6,464	5,773	+ 691
Unknown Year of H.S. Graduate, GED or Other	6,012	5,199	+ 813
TOTAL FTF Class	27,962	26,960	+ 1,002

There were, as Table IV indicates, 502 fewer (138 in-state and 364 out-of-state) 1980 high school graduates in the freshman class of 1980 than there had been 1979 high school graduates in the Fall 1979 freshman class. The net increase in the

freshman class of 1,002, Fall 1980 over Fall 1979, can therefore be attributed to freshmen who had been out of high school at least one year; students whose high school or year of graduation is unknown by the institution; or students entering with a GED.

The composition of the first-time freshman class by type of higher education institution (doctoral; masters and baccalaureate; and associate degree granting) is illustrated in Figure 9 and Table V. It is seen that the portion of the first-time freshman class is comprised of same year high school graduates differs depending on type of higher education institution. For instance, in the doctoral degree granting institutions the first-time freshman class is comprised primarily (92.9% - Table V column 6) of 1980 high school graduates (from in and out-of-states combined). The comparable figure for the master's and baccalaureate degree granting insitutions is 69.2%; while 1980 high school graduates comprise 42.6% of the first-time freshmen class of associate degree granting institutions.

Within the three sectors, the composition of the first-time freshman class differs among institutions. For instance, from Table V it can be seen that five institutions comprise the doctoral degree granting sector. The first-time freshman class of the University of Colorado-Boulder contains an almost equal representation of in and out-of-state 1980 high school grad (48.2% and 45.5%). By comparison, the 1980 Colorado high school graduates comprise approximately three-fourths of the first-time freshman in the other four institutions.

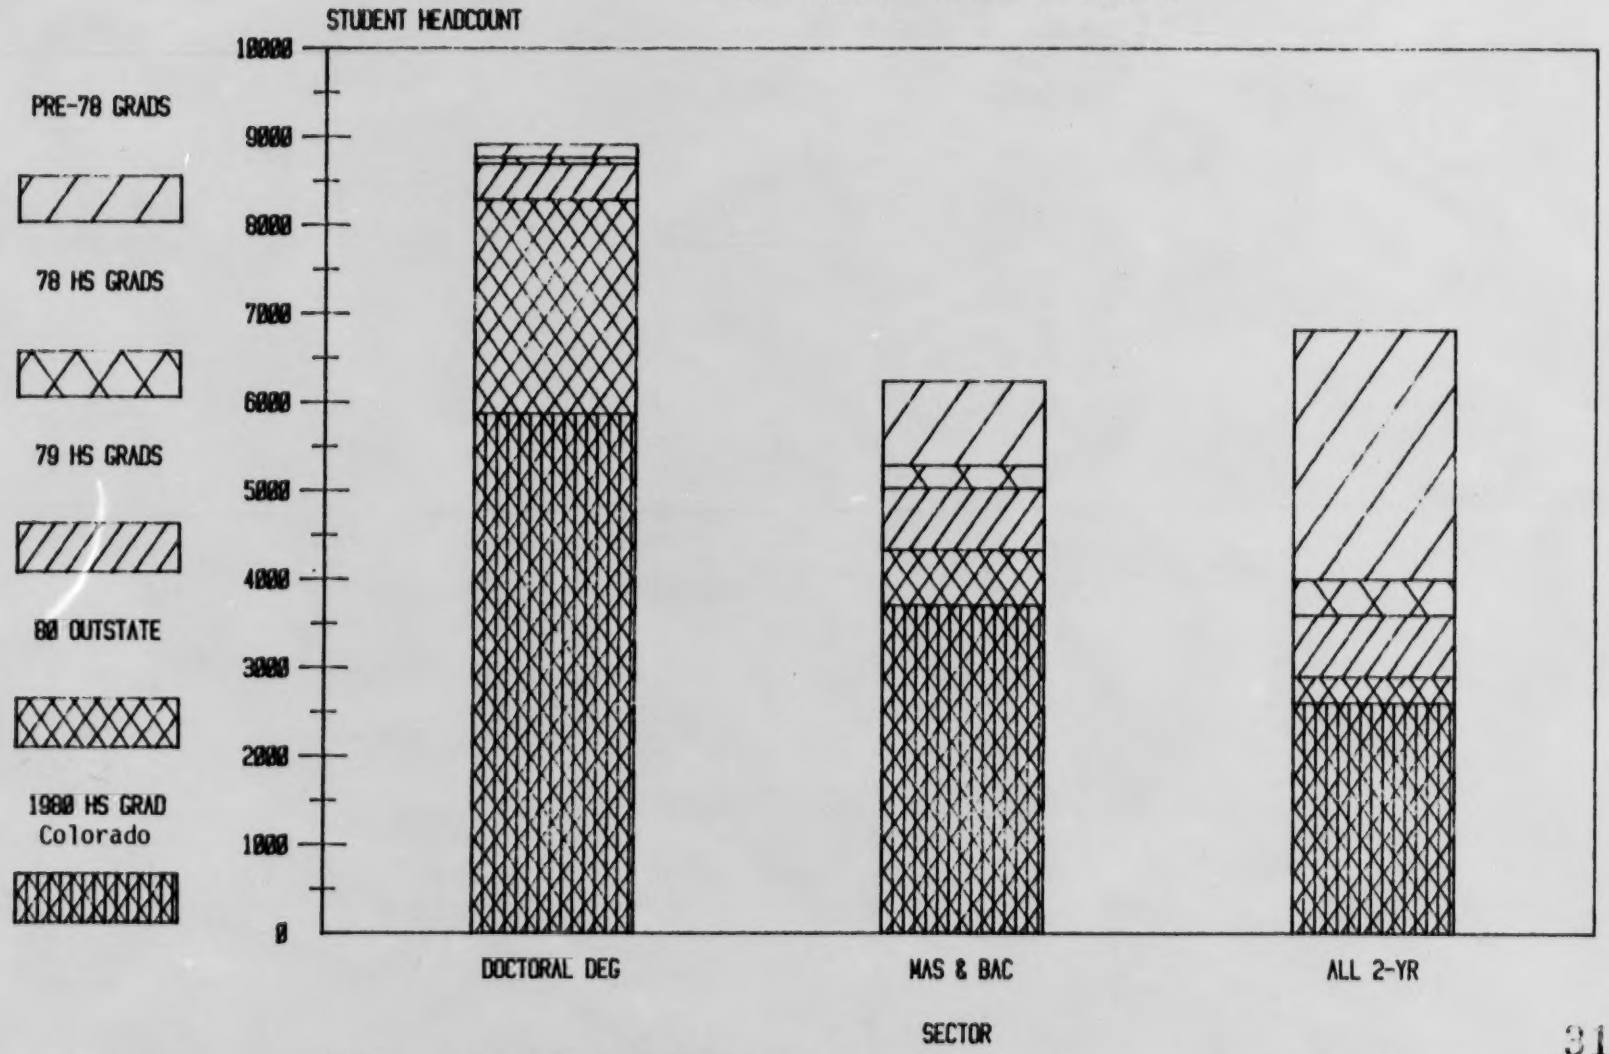
Figure 9

ANALYSIS OF FLOW OF H.S. GRADS

TO COLORADO PUBLIC HIGHER ED. BY SECTOR



NOTE: Does not include first-time freshmen with origin classified as "Unknown, GED, or other" - this category represents 114 students in doctoral degree granting institutions, 114 at Master's and Baccalaureate degree granting institutions and 5,483 in two-year institutions.

Within the two-year, or associate degree granting sector, a higher portion of the first-time freshman class of rural community colleges is made up of same year high school graduates than is the case with their sister urban community colleges.

The total number of 1980 Colorado high school graduates continuing on into Colorado public higher education, as indicated previously, was 12,197. How were these 12,197 divided among the three categories of institutions? Nearly one-half (48.7%) entered the five doctoral degree granting institutions; 30.5% matriculated at seven master's and baccalaureate degree granting institutions; while the remaining 2,589 or 21.2% entered the fourteen two-year associate degree granting institutions. (Comparable figures for 1979 were 48.7% doctoral institutions; 28.4% master's and baccalaureate degree granting institutions; and 22.8% community and junior colleges). Information of this nature is of vital importance in the process of developing enrollment forecasts at the sector level.

Out-of-State 1980 High School Graduates into Colorado Public Sector

1980 high school graduates from each of the forty-nine other states, District of Columbia, as well as U.S. Territories and foreign countries, are represented in the Colorado public sector's Fall 1980 first-time freshman class. These out-of-state students number 3,289 and represent 11.8% of the total first-time freshman class. (Figure 8) the comparable 1979 figure was 3,653 or 13.6% of the first-time freshman class.

The three states sending the greatest number of 1980 high school graduates into Colorado public higher education are California, Illinois and New York. These three states have remained the top three for over ten years. Figure 10 presents a display of the origin of 1980 out-of-state high school graduates, by sending state, while Table VI displays the sending states in rank order. Not shown in Figure 10 are the 111 first-time freshmen from foreign countries or the 11 from U.S. Territories and Possessions.

From 1979 to 1980 there has been an overall decline of 364 students coming to Colorado from out-of-state. For instance, looking at the top four sending states, California sent 28 more students in 1980, however the number from New York dropped by 49 (260 to 211) and those from Illinois by 54 (361 to 307). The fourth ranking state, New Mexico, sent the same number (197) in both years.

III. Composition of the First-Time Freshman Class, continued

B. Private Sector - Colorado Higher Education

Fall 1980, there were 3,149 first-time freshmen enrolled in the eleven private higher education institutions which comprise this study.[3]

It has been noted in Section I of this report that 875 of the private sector's first-time freshmen came from the Colorado public high school graduating classes of 1980, and an additional 89 were 1980 graduates from Colorado private high schools. Figure 11 shows the flow of Colorado 1980 high school graduates into the first-time freshman class of the private sector and depicts what percent that group is of the combined Opening Fall Enrollments of the eleven institutions.

---

[3] Private higher education institutions not included (due solely to not enrolling freshmen) - Conservative Baptist Theological Seminary, Iliff, St. Thomas Seminary, and Yeshiva Toras Chaim Talmudical Seminary.

COLORADO

1980 FLOW OF HIGH SCHOOL GRADUATES

INTO PRIVATE SECTOR HIGHER EDUCATION

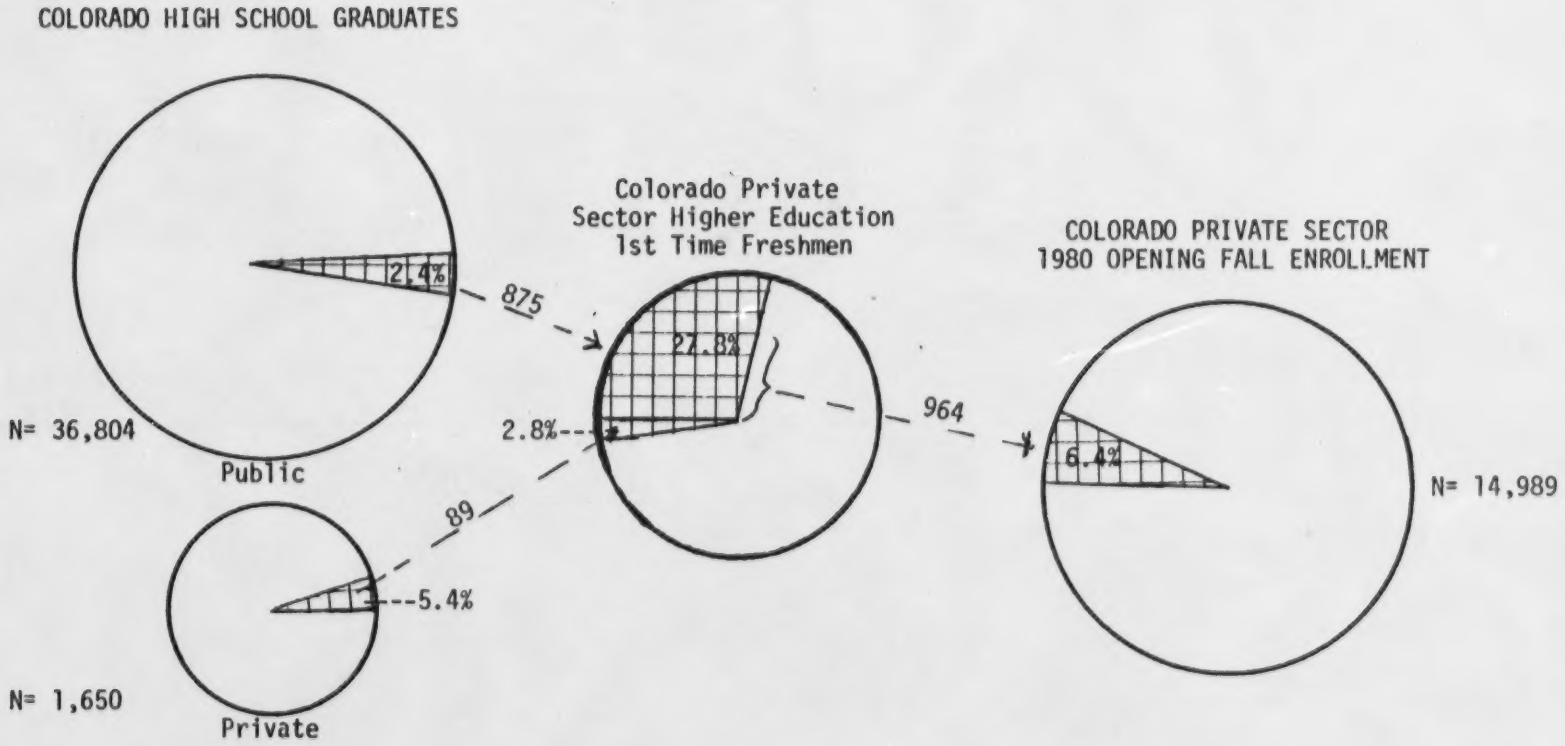

Figure 11

Comparing the public and private sector's first-time freshmen classes, 1980 Colorado high school graduates comprised 43.6% of the public sectors first-time freshman class (Figures 7 and 8) and 30.6% (27.8% + 2.8%) of the private sector's first-time freshman class (Figures 11 and 12).

Those 1980 Colorado high school graduates entering the public higher education sector comprised 8.7% of the total opening Fall enrollment while their counterparts entering the private sector of higher education represented 6.4% of that sector's opening Fall enrollment.

Figure 12 and Table VII illustrate the composition of the first-time class both for the eleven private institutions as a whole, and by institution.

TOTAL	3,061	944	31.5	1,327	43.3	2,291	74.8	299	9.8	71	2.3	400	13.1	88

As indicated in Figure 12, approximately four of every ten private sector first-time freshman graduated in 1980 from an out-of-state high school. The comparable figure in the public sector was one out of each ten.

Similarities exist in the proportion of the public and private sector's first-time freshman class that graduated from high school one or more years prior to college matriculation (approximately one-fourth in each sector).

1980 Colorado public high school graduates comprise a larger share of the public sector's first-time freshman class (41.9%) than is the case in the private sector (27.8%). However, combining in-state (both public and private high school graduates) and out-of-state 1980 high school graduates the share this combined group represents in the public sector is 55.4%, and in the private, 72.7%.

The composition of the first-time freshman class of the private sector by institution, as presented in Table VII, reflects the fact that the first-time freshman classes of Colorado College (C.C.), Colorado Women's College, Regis College, and the University of Denver, are comprised mainly (90 to 100%) of 1980 in and out-of-state high school graduates (column 7). By comparision, Technical and Bible colleges have first-time freshmen classes that are heavily weighted with high school graduates of three plus years delay to first-time freshman status.

Additionally, the first-time freshman classes of D.U., Colorado College, and Regis College contain better than 50% out-of-state 1980 high school graduates (Table VII, column 5). By comparison, the majority of the first-time freshman class of Colorado Technical College and Nazarene Bible College had been out of school at least three years before entering those institutions (column 13).

The distribution of the 875 1980 Colorado public high school graduates among the sectors, or type of receiving institution, was as follows: doctoral degree granting institution (University of Denver), 38.6%; master's degree granting (Colorado College), 19.9%; baccalaureate degree granting (Colorado Women's College, Loretto Heights, Regis, Rockmont, Colorado Technical College, Intermountain Bible, and Western Bible College), 30.4%, and associate degree granting institutions (Nazarene and Parks College), 11.1%.

The distribution of the 89 1980 Colorado private high school graduates entering Colorado private higher education institutions was: 23.6% to the University of Denver; 24.7% to Colorado College (master's degree granting); and the remaining 51.7% to the seven baccalaureate degree granting institutions listed above.

Out-of-State 1980 High School Graduates into Private Higher Education

As indicated in Figure 12, 42.1% (1,327) of the private sector's Fall 1980 first-time freshman class was graduated from out-of-state high schools the same year as matriculation. Each of the other forty-nine states, and District of Columbia, as well as U.S. Territories and foreign countries, are represented in the freshman class.

The top three sending states to the private sector are the same three that sent the greatest numbers into the Colorado state-supported institutions. Illinois, California and New York combined sent to the private sector three out of every ten of the out-of-state first-time freshmen.

Figure 13 displays the origin of out-of-state 1980 high school graduates by sending state while Table VIII displays the sending states in rank order. Not reflected on Figure 13 are the 66 first-time freshmen from foreign countries nor the 7 from U.S. Territories and Possessions.

An overview of out-of-state freshmen by state of origin (in alphabetical order) and by sector of receiving Colorado institution may be found in appendix B.

SUMMARY

College participation rates are one of the important factors to be included in any attempt to forecast enrollments whether at the state or institutional level of planning.

It is anticipated that the data presented in this report will not only serve the Colorado Commission on Higher Education and its advisory panel on enrollment forecasting, but will also be vital input to the planning process of individual public and private higher educational institutions.

Another benefit of the data is that it gives each individual school district, as well as the administration of the Colorado Department of Education an indication of the number of current year high school graduates who remain in Colorado and proceed directly into higher education.
